

Final Exam information
Department of Medical Microbiology
(GM, English Program, 2nd semester)

Dear students,

The signatures for Medical Microbiology II will be registered in the NEPTUN system on week 15. We recommend that the students have their lecture books signed on the days of the Final Examinations (on each exam date, we will sign the lecture books for the students sitting for the exam). In addition, the students can deposit their lecture books **at the Practice Room of the Department (ground floor of IVDI Bldg.)** from 9.00 to 12.00 each workday between 22 May and 9 July 2014. In this case, the lecture books will be signed by the following second workday. Missing signatures can be made up during the registration week in September.

To get an exemption from the written entry test at the final exam, the cumulative test score of the two tests written in the second semester must be at least 75% (total points ≥ 90 p.). There is definitely no possibility for the students to get extra points from other sources than these 2 tests, decrease the limit, or change the calculation rules. Exemptions obtained in this semester are not valid for later semesters.

On each exam date, all students (including those who are exempted from the written test) must be present at **8.00 at the Practice Room of the Department (ground floor of IVDI Bldg.)**. The passing level of the entry test is 80 % (8 out of the 10 questions). The oral examination consists of one practical and three theoretical questions. In this semester, the practical exam includes only the equipment and rules of specimen collection.

Debrecen, 19 May 2014
