

To postponers of Medical Microbiology FE (General Medicine – English Program)

Students who obtained signature for Medical Microbiology II in a previous academic year are now **exempted from attending** the 2nd semester practices. However, these students also have to take the subject in the NEPTUN system. Exemption from the written part of the Final Examination can be obtained by writing the mid-semester tests in **this semester** (exemptions obtained in previous academic years are not valid for this year). The Department provides the possibility also for the postponer/repeater students to write the self-control tests.

During the semester, two tests are written (on the 5th and 12th academic weeks). The exact dates of the tests will be announced later on **our website**. The students can survey their corrected tests only during the practices specified for this purpose by the Head of the Department (usually 1 or 2 weeks after the test). **The students whose cumulative test result (of the 2 tests written in this semester) scores at least 75 % will get exemption from the written test at the final exam.**

Debrecen, 7 February 2014

Dr. György Veress
Academic advisor

Dr. József Kónya
Head of the Department
